SECTION 2

There are 8 questions in Section 2

Based on the situations given:-

Identify any infringements

Possible Actions and

Your reasoning behind your eventual conclusion

Example 1:

Red WA crosses into the goal circle in an attempt to get free of the Blue WD. At the same time the Blue GD intercepts a shot for goal by the Red GA. This is the second time that the Red WA has done this in the last five minutes.

Infringement	Offside and Game Management
	1 mark
Possible	Play Advantage or award a Free Pass to Blue team for offside or apply the
Actions	Game Management Rule and caution the Red WA advising that the
	behaviour must change
	1 mark
Reasoning	Red WA is out of position and the Blue team are in possession of the ball, so the Blue team may have a clear opportunity to go on the attack. Red WA being offside may interfere with the other players in the goal circle and mean that the Blue team cannot get the ball out of the goal circle and therefore the Umpire may choose to penalise the offside. The Umpire may have to consider the action of the Red WA. If the offside is considered to be persistent then the Umpire would deal with this under game management and caution the Red WA advising that the behaviour must change.
